Save with Co-op Connections Card

By Rick L. Eichelberger

SUMMER has quickly come and will soon be gone, but that doesn't mean the fun has to end. Did you know New Enterprise Rural Electric Cooperative has a program in place to help you save on a variety of goods and services, from hotel discounts to fitness club memberships?

The Co-op Connections Card is a free program that saves New Enterprise Rural Electric members money on everyday expenses. The card also gives you access to the Cash Back Mall, where you can get money back for shopping online at over 3,000 leading online retailers.

Your Co-op Connections Card gives you access to discounts from tens of thousands of retailers because it taps into a national business community. But it doesn't just help you save at big box stores and chains. In fact, it was created specifically to help businesses on our nation's Main Streets. And the program consistently adds new retailers to help improve our members' experience. One of the most popular features is the prescription discount benefit. Even if you don't have insurance, the card will help you save up to 85 percent on your medications at more than 60,000 pharmacies across the country.

There are also valuable coupons available — every day! There are hun-

dreds of printable grocery coupons with discounts on top brands and promo codes for online shopping. An appliance rebate finder allows you to locate rebates for energy-efficient appliances. You can filter by appliance type and brand, or search for specific models. Once you find the deal you want, link to the rebate form and submit it to save on your purchase.

We know how important it is to save, and we want to make sure you are taking full advantage of the programs being offered. The Co-op Connections Card is an easy way to see the value of being an electric cooperative member. So don't let the end-of-summer blues get you down. Plan a trip for the family, get fit with a discounted gym membership or take advantage of other deals available to you. It really is the one card that does it all.

You can learn more about the discounts being offered by visiting www.connections.coop or calling our office at 814-766-3221 or 800-270-3177. ☀

Capital credits

New Enterprise Rural Electric Cooperative is a not-for-profit organization. That means if there are excess margins (also known as profits), these amounts are allocated to the members. The amount retired (refunded) back to you is based on the amount of electricity you used in the designated year.

We have served numerous members over the years. Some of these are now former members. We try to keep our database

updated for accuracy; however, we sometimes lose track of where people are once they have left our system. Even when members have moved or passed away, we still need to update their information regularly, so we are asking for your help to locate these people. If you recognize a name listed below, please contact the office with their updated information.

Also listed are people who have not cashed their capital credit checks in 2016. If you see your name, you may have an uncashed check. Please cash the check or contact our office.

Thank you!

2016 Youth Tour

NEW ENTERPRISE Rural Electric Cooperative sent three great students from Northern Bedford High School on the 2016 Youth Tour to Washington, D.C. Here are some of their comments about their trip:

“NRECA Youth Tour was an experience of a lifetime! It was a unique opportunity to meet people from around the country and learn about the importance of electric cooperatives across the country. I enjoyed touring Washington, D.C., and meeting my U.S. representative. I want to thank New Enterprise REC for funding my trip and giving me this amazing opportunity. I have met friends and made memories I will never forget.”

— *Xiara Long*

“We had a great time, learned a lot, had new experiences and made

CAPITAL MEMORIALS: Youth Tour participants pose on the steps of the Jefferson Memorial.

new friends. All of us had been to Washington, D.C., before, but I don't think any of us had seen the Iwo Jima parade or the Pentagon Memorial. We had good weather to walk around and good people to talk to. The chaper-

ones were very responsible and kept a vigilant eye on all the kids. We had a great time and would recommend this to students next year.” — *Matt McCloskey*

“I went on the co-op trip to Washington, D.C. This trip was so much fun, something I would suggest others do. I really liked the trip and had a blast. We were always busy and had something new and exciting to see. When we had down time, the guys would always get together and hang out in the lobby and try to meet new people from other states. I feel like that was the best part of the trip — trying to find out what states others were from. Then the kids on my bus all decided to meet a few times this summer so we can stay in touch. I am still talking to a few of them. I highly suggest this trip to others. I wish I could go back to be with everyone again.” — *Dillon Morris* ☀️

‘Dog days’ of summer

Even though the dog days of summer are coming to an end, that doesn't mean the hot days are over. Summer technically doesn't end until Sept. 21, so we could still have some sultry days yet to endure. Using your air conditioner or central air unit properly during these hot days will keep your energy costs down.

The myth that turning your unit down past your normal temperature

setting will cool your home more quickly is just that — a myth. In reality, this will cause your energy cost to rise. Your unit will continue to run longer to get to that cooler temperature. If you plan to be away from home for most of the day, you can manually set the temperature about 5 to 10 degrees higher than your normal setting. Once you return, set the temperature back to normal. You can also install a programmable thermostat to make these changes for you automati-

cally. Another tip is to close curtains and blinds to deflect the sun's heat coming in the windows, which causes the rooms to be warmer than normal.

After the dog days of summer are over, we will welcome Old Man Winter. Remember, these tips work in the winter also when heating your home. Set your thermostat 5 to 10 degrees lower when away, and open curtains and blinds to let the sun's heat in to keep rooms warmer. ☀️
